

Report for 2002NC3B: A Systematic Evaluation of Polyacrylamide for Sediment and Turbidity Control

- Conference Proceedings:
 - Bartholomew, N., R.A. McLaughlin and D.L. Hesterberg, 2002, Polyacrylamide to Reduce Turbidity in Runoff. Agronomy Society of American Annual Meetings.
 - Hayes, S.A., R.A. McLaughlin, N. Bartholomew, and D.L. Osmond, 2002, Polyacrylamide Use of Erosion and Turbidity Control. Agronomy Society of American Annual Meeting.
 - McLaughlin, R.A., S.A. Hayes, N. Bartholomew, and D.L. Osmond, 2002, Testing Polyacrylamides for Erosion and Turbidity Control. Soil and Water Conservation Society Annual Meetings.
- Other Publications:
 - McLaughlin, R.A., 2002, Measures to Reduce Erosion and Turbidity in Construction Site Runoff. N.C. Dept of Transportation & Center For Transportation & Environment, Joint Project 201-05 Final Report, 131 pgs.
- Dissertations:
 - Bartholomew, Nathaniel, 2003, Polyacrylamide to Reduce Turbidity in Runoff as Affected by Soil and Polyacrylamide Properties, MS Dissertation, Soil Science, College of Agriculture and Life Science, North Carolina State University, Raleigh, NC.
